This is to advise you that the following products have been changed.

Product ID (Description):

Photointerrupters in the series GP1A, GP1L, GP1S, GP2S, GP3A, and GP3S, packed in bags

Description of Change:

Currently, when the above photointerrupters are packed, the bags are stapled shut. Sharp is changing the closure method to tape. This will avoid flying staples when the bags are opened. This change will be phased in to normal production beginning in March 2009. See the illustrations below.

Sharp is making no changes to the optical, reliability, quality, mechanical, electrical, or RoHS specifications.

Effect of Change:

Beginning in March 2009, the photointerrupters in the above series will be sealed in their packing bags with tape. There is no effect upon optical, reliability, quality, mechanical, electrical, or RoHS specifications.
